

تثبيت docker

- ١- قبل البدء نتحقق أولا من نظام virtualization
- ٢- تثبيت WSL 2 باستخدام الامر `wsl --install`
- ٣- من الموقع الرسمي نحمل docker desktop
- ٤- نختار download for windows-AMD64
- ٥- بعد التثبيت نضع اسم الايميل لربطه مع البرنامج

اختبار اول حاوية hello world

- ١- كتابة الامر `docker run hello-world` في cmd

```
C:\Users\am>docker run hello-world
Unable to find image 'hello-world:latest' locally
latest: Pulling from library/hello-world
17eec7bbc9d7: Pull complete
ea52d2000f90: Download complete
Digest: sha256:05813aedc15fb7b4d732e1be879d3252c1c9c25d885824f6295cab4538cb85cd
Status: Downloaded newer image for hello-world:latest

Hello from Docker!
This message shows that your installation appears to be working correctly.

To generate this message, Docker took the following steps:
1. The Docker client contacted the Docker daemon.
2. The Docker daemon pulled the "hello-world" image from the Docker Hub.
   (amd64)
3. The Docker daemon created a new container from that image which runs the
   executable that produces the output you are currently reading.
4. The Docker daemon streamed that output to the Docker client, which sent it
   to your terminal.

To try something more ambitious, you can run an Ubuntu container with:
$ docker run -it ubuntu bash

Share images, automate workflows, and more with a free Docker ID:
https://hub.docker.com/

https://docs.docker.com/get-started/
```

- ٢- سيتم تحميل الصورة من docker Hub وتحميلها في الجهاز

- ٣- هكذا تم انشاء اول حاوية بصورة جاهزة ويمكن انشاء صور خاصة بنا.
